

Compliance made simple for small businesses

Most small businesses can't justify an in-house compliance manager or a bespoke annual consultant fee. Verfapp is a cost-effective, self-serve way to see where you stand and keep your compliance records in one place.

● Start with a free Health Check

Cyber Health Check any business

65 plain questions in about 20 minutes: a rating, every gap with what to do about it, and a roadmap.

FAP Health Check financial advice firms

Designed to help you consider CAP expectations: 36 plain questions and a scored report with your biggest gaps first.

● Everything in one place

Risk register

Score risks on a 5×5 matrix and track the actions that bring them down.

Policies & procedures

Versions, owners and review dates, plus an AI audit you respond to and sign off.

Suppliers & outsourcing

Every supplier in one list, rated by risk tier, with contracts and checks.

Business continuity

A plan from a short impact analysis, with its review and tests.

Incidents & complaints

Record complaints, incidents and breaches, and keep the evidence.

Compliance calendar

Reviews, tests and deadlines with due-soon and overdue flags.

Obligations register

Ready-made obligations, each with owner, evidence and RAG status.

CPD & development plans

Annual plans, CPD activities and evidence with manager sign-off.

Advice Review with AI

On request: AI review of insurance advice files, confirmed by a person.

■ For any small business ■ Extra tools for financial advice firms

● How it works

1 See where you stand

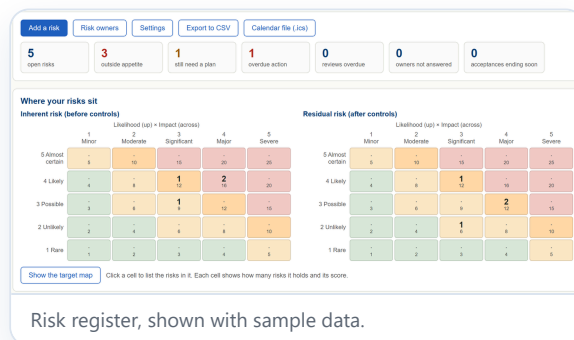

Take a free Health Check and get a rating, with your biggest gaps and what to do first.

2 Keep your records

Pick the tools you need. Add more later. Export to CSV any time.

3 Get expert help

Want more than software? Our consultancy can review your records and controls, including cyber risk, or help with a project.

● Built with security and privacy in mind

Encrypted

In transit (HTTPS) and at rest, on Microsoft Azure.

Controlled access

Only your business can open your records.

Backed up

Automatic backups, a tested restore, logging and alerts.

AI is labelled

AI output is always marked, and a person decides.

Verfapp supports your compliance; it does not certify it, and it is not legal advice. Health Check results are self-reported, not tested, and not an assurance of security or compliance. Platform tools shown are live; some are switched on for your business on request.

Start with a free Health Check

A cyber check for any business, or the FAP check for financial advice firms.
